Subject: Phillips 66 Oil Train

To The Planning Commission Of San Luis Obispo and all interested parties,

My husband and I are gravely concerned about the possibility of trains carrying large amounts of oil and gas on the Union Pacific rail line through Goleta. Our home is located in The Bluffs neighborhood, just down hill from the railroad tracks. If an accident or spill occurred on the tracks near us, it would destroy our neighborhood and home. In 1978 an earthquake derailed a train across the street from our neighborhood. If that train had been carrying crude oil the loss of life and property would have been horrific. The Union Pacific railroad tracks run right through our beautiful neighborhood, past the local elementary school and a new retirement home. It is irresponsible to allow the transportation of dangerous cargo through such a heavily populated area. The responsibility for any deaths or damage will be on yours, if you approve Phillips 66's oil train request.

Please VOTE NO on THE PHILLIPS 66 OIL TRAIN REQUEST!

Thank you,

Kathy & Tom Ormseth
